

Peter Skryzalin will spend the summer doing research with the [Penn State Bushveld – Africa Array REU](#) project. This project is a partnership between the Pennsylvania State University of The United States and the University of the Witwatersrand of South Africa. Students spend 6 weeks at Penn State and 3 weeks in South Africa studying the 2.06 Ga Bushveld Igneous Complex. Peter will participate in the Geophysics & Seismology component lead by Dr. Andy Nyblade.
